

## ASSOCIATE OF SCIENCE IN HEALTH ADMINISTRATION

*The road to advancing your health care career*

### What will I do as an Associate of Science in Health Administration Graduate?

The Associate of Science degree in Health Administration program is designed to meet the needs of individuals who desire to work in the allied health industry. As a graduate of the Associate of Science in Health Administration you'll gain the skills needed to interact and/or manage other employees in an office setting. Also, the program will expand your knowledge and understanding of general education courses which are beneficial for interacting within a healthcare community, and will afford you the opportunity to accept positions and/or promotions at a higher level of employment.

### What careers are available after I graduate?

According to the Bureau of Labor Statistics, employment of health care administrators is expected to grow 21 percent from 2010 to 2020 nationally, and 22 percent in California.

As a graduate, you would have learned the skills needed to work in health care institutions, hospitals, clinics, medical offices or health maintenance organizations.
