

CENTRAL SERVICE INSTRUMENT TECHNICIAN

Mastering the tools of the trade

What will I do as a Central Service Instrument Technician?

The Central Service Instrument Technician (CSIT) program will provide you with the knowledge, skills, abilities and experience needed to function as a Central Service Instrument Technician. This program will prepare you to function effectively in providing indirect patient care and safety to the patient. You will develop skills in instrumentation, chemical disinfection, sterilization, decontamination, quality assurance, and inventory control.

For more information about graduation rates, the median debt of students who completed the programs, and other important information, visit www.glendalecareer.com/gainful-employment

What careers are available after I graduate?

As a graduate of the Central Service Instrument Technician Program, you may be employed as a Central Sterile Supply Technician, Sterile Processing Technician, Certified Registered Central Service Technician, Sterile Preparation Technician, Sterile Processing and Distribution Technician, Medical Supply Technician, Sterile Technician, and Materiel Reprocessing Technician.

Central Service Instrument Technicians can be found in the Central Processing department of a hospital or many types of surgical centers.
