

SURGICAL TECHNOLOGIST

A vital member of the operating room team

What will I do as a Surgical Technologist?

Surgical Technologists assist with surgeries by passing instruments to surgeons, maintaining sterile fields and safe environments for patients, handling setup procedures, keeping instrument tables organized, managing operating room supplies, understanding surgical procedures, and handling clean up at the end of surgeries.

While surgeons are focused deeply on the task at hand, Surgical Technologists provide essential support to ensure that procedures flow smoothly and successfully.

What careers are available after I graduate?

Surgical Technologists work in general, community, and veterans hospitals, as well as ambulatory surgery centers that offer cosmetic and other surgeries.
